## Writing

Time: 30 min

Do you agree or disagree with the following statement?

**Childhood is the happiest time of a person's life.**

Use specific reasons and examples to support your opinion.

You should write about 100 - 150 words.

Childhood is the happiest time of a person's life. I agree with the statement because little kids are the most loved. ~~At~~ No one would intentionally harm a child. when we grow up, we are faced with the ~~that~~ reality of life, with sorrow and dread, with death and everything else. The children don't know, how complicated life really is, so they are happy in that ignorance. Children don't know, about how much their parents sacrifice for them, so they don't worry about it. Not that they don't care, they don't know to care about it. If they even knew - they wouldn't understand. The children don't know what real loss ~~is~~ is - so they don't cry, they are happy because they can ignore reality. they know enough to be happy, and that's all they think about.
